

SMS Command Example Command/Report (Short form use if available)

SAFETY AND SECURITY REPORTING

LISTEN – Your T22 will call you up and allow you to listen to the area around the unit. Requires optional T22 Nanny accessory microphone.

LISTEN

Personal Assistance – Pressing the panic button for more than 2 seconds will send 2 reports to all users.

Tramigo: alarm detected, panic button activated, parked, at Tramigo Office, Bel Air, Makati City, PH, 14.55895, 121.01931, 03:05 Oct 30

Phone Calls – Pressing the phone button for more than 2 seconds will call the 1st user in the speed dial list. Pressing a second time will call the 2nd user up to 3 users. Use SD,1,phoneNumber to add a number to slot 1. SD command will list the users you have set. To answer incoming calls press the phone button. A hands free kit is needed to use this feature.

PERFORMANCE REPORTING

SPEED,x

Reports if car travels above x km/h. Range is 10-300. Reports again after car has slowed 10km under limit.

SPEED,OFF turns off reporting

S,100

S,OFF

Tramigo: 130 km/h speed limit detected, moving, 0.35 km S of Harrison Plaza, Manila, NCR, RP, with speed 131 km/h, 08:30 Nov 2

SETUP AND MAINTENANCE

NAME,name – Sets the name of your car (up to 15 characters). User must have OWNER authority

NAME,Gavin's Car

ADDUSER,<phone number>,level – Adds replaces an entry in the user list. Level can be OWNER, FRIEND, or GUEST. Owner can issue all commands, Guest only FIND

LISTUSER Lists the last 4 digits of each user

LISTUSER,ALL Lists the complete details of all users

DELUSER,X Deletes a specific user

User must have OWNER authority.

AU,+5555555,OWNER

Adds the number with OWNER authority

LU

Tramigo: ListUser, 1-4556 2-5555, 22:58 Nov 21

LU,ALL

Tramigo: ListUser, #1 +5555555 Owner - reports: Power - Trip, 22:58 Nov 21

DU,2 Deletes user number 2

ADDPLACE,place – Adds your own location to the Tramigo location directory. Tramigo will use the coordinates of the location your vehicle is currently at. Best to park your stop your vehicle first.

DELPLACE,place

Removes a location you have added or an pre-loaded location. Place name must be an exact match.

AP,Office

Name can be up to 40 digits. Upper and lower case. Letters and numbers only.

Now try a F command:

Tramigo: parked, at Office, 20:38 Nov 5

DP,Office

STATUS – Reports the status of the unit and which reports are turned on for you.

ST

Tramigo: Status, GPS: 60%, GSM: 80%, battery: 100%, reports: Trip (15), Speed (100), Zone (2.0, 14 33'31"N, 120 59'30"W), 19:12 Nov 7

SETTINGS – Reports the status of all reporting for the unit and the number of user locations you have added. For each report the user number is shown.

SETTINGS

Tramigo: Settings, Alarm:-, Find:-, Ignition:-, Power:1, Trip:1/3/4, Speed:-, Zone:1/2, user locations:2, Metric:on, 14:51 Nov 7

COORD,ON – Adds geographic coordinates to all locations. COORD,DMS will show decimal degree format.

COORD,ON

Tramigo: parked, 0.35 km S of Harrison Plaza, Manila, NCR, RP, 14 33'34"N, 120 59'28"W, 11:33 Jan 22

PASSWORD,oldPassword,newPassword – Changes the password for your T22. The password can be 20 characters in length. Letters and numbers only and is not case sensitive.

PASSWORD,0000,GAVIN123

Tramigo: Password,changed to GAVIN123, 11:33 Jan 22

Trouble Shooting

Problem 1: T22 is not responding.

Possible Causes: No power or unit is sleeping

Possible Solution: Check that the unit has power. The power light should be blinking every 5 seconds. Check that the battery is installed correctly. If the battery is low then connect the unit to a power source. If the unit is sleeping it will wake and respond to your SMS. Call the unit to see if you hear a ring tone see problem 3 if not see problem 2.

Problem 2: Unit is not responding and the GSM light is red.

Possible Causes: T22 is unable to acquire a GSM signal at current location, SIM not properly inserted; no SIM installed on the unit, SIM has PIN code set.

Possible Solution: Move the unit where there is a strong signal, Remove SIM and reinsert SIM to the unit, install a SIM to the unit, remove the SIM PIN code.

Problem 3: Unit is not responding and the GSM light is flashing.

Possible causes: SIM is out of credits if pre-paid account, or there is a temporary network problem, or the phone number of the user is incorrect.

Possible Solution: Check and make sure SIM has sufficient credits, wait for the network to recover, check the phone number of the users.

Problem 4: Unit reports old position or No GPS lock and GPS light is red.

Possible causes: T22 is upside down, has no clear view of the sky, nearby trees, houses or buildings obstructing satellite signal, metallic tinting of the windshield.

Possible Solution: Move to a place where the T22 (Tramigo logo facing up) has a clear view of the sky, ensure that tinting is non-metallic. To test the tint, move the unit outside the vehicle and see if GPS light goes off within a minute.

Problem 5: Unit reports unknown location.

Possible causes: The T22 Location Directory has not been loaded.

Possible Solution: Contact your dealer or Tramigo support to obtain the Location Directory for your region.

T22 Indicators

Power – Flashes every 5 seconds, solid when charging, off when sleeping or when power is shut off

GSM – Off means OK, On when no signal, flashes when there is a problem sending a SMS.

GPS – Off means OK, On when no location can be determined.

T22 Sleep Mode

T22 has automated power management with 4 sleep modes to extend the battery life for portable users and prevent draining your car battery for installed users. When sleeping all the lights are turned off to save power. Your T22 will sleep 1 hour after a trip or after 5 minutes of inactivity. T22 wakes up when a trip starts, or motion is detected.

1st Sleep Mode – Shuts off GPS, wakes each hour for 5 min for 6 hours

2nd Sleep Mode – Also shuts off GSM so you have to wait for the unit to wake up to answer your SMS. Lasts for 5 days

3rd Sleep Mode – Wakes up every day for 5 minutes. Lasts until the battery power is very low.

4th Sleep Mode – Will only wake up when connected to power.

If you still have problems contact your dealer or email support@tramigo.net for assistance.

Thank you for purchasing your Tramigo tracking device!

This guide will help you set up your T22 quickly and easily. If you have any questions contact your dealer or send an email to support@tramigo.com. On Skype search for Tramigo Support to find online support staff. Check www.tramigo.net for support updates and new Tramigo accessories.

Installation Steps

Step 1. Install

If your T22 has been already installed skip to Step 2 – Setup.

1. Charge your unit for 3 hours using the wall charger. Make sure the battery is installed and use the USB cable to connect the unit to the charger then press the power button for 2 seconds. When charging the power light will remain on solid until finished. If the unit has been in storage it may take 15 minutes for the power light to turn on.

Tip: The battery cover will not close if the battery clip is not fastened properly.

2. Power off the unit and insert the SIM card. After charging the unit you need a SIM card so you can communicate with your T22.

Ensure that the SIM card is not protected by a PIN number – this can be done by inserting the SIM into a suitable mobile telephone and then following your mobile telephone instruction booklet to remove the PIN lock. Your SIM account must be setup to allow SMS (text) messaging. You can test the SIM in a hand phone to make sure it can send a SMS.

Remove the battery cover and remove the SIM holder as shown in the photograph. You can use a pen to push the yellow button then pull out the SIM holder. Place your SIM in the holder and push back into the unit.

After the SIM is installed then make sure the battery is installed and turn on the power to the unit. The Power light should flash every 5 seconds. The GSM light will be red for a minute and will turn off when connected to the GSM network. If the light remains red then check the troubleshooting section.

3. Select Unit Location

T22 Cigarette Lighter Adapter and USB cable

Depending on how you plan to use your Tramigo refer to the guidelines below

Portable Use – Battery power

Take the unit outside until the GPS light goes off – now the unit knows its location. For backpacks or bags try to place the unit at the top of the pack facing up. On a belt pack the unit will work on its side, For vehicles the unit can be placed in a tissue box, glove box or in a pillow in the back window. For motorcycles or scooters place in a storage compartment – the unit can also be placed in the rugged case accessory to prevent damage.

The battery should last several days depending on usage, so turn on Power reporting (P,ON) when you set-up the unit to notify you when the battery needs charging. Use the wall charger like you would with a mobile phone.

Vehicle Use – Vehicle Power

Take the unit outside until the GPS light goes off – now the unit knows its location. Plug the power cable into a

Removing the SIM holder.

T22 Cigarette Lighter Adapter and USB cable.

cigarette lighter plug, preferably one that is also powered when the ignition is turned off.

Your T22 must be placed with the Tramigo Logo on top facing to the sky. This is to allow your T22 to determine its location from the signal made by GPS satellites orbiting the earth. Materials such as metal, metallic window tinting, and rear window defoggers must be avoided because they can block these signals.

If you are parked inside a building or under any structure you will not get a location until you have a clear view of the sky.

In general, you can expect that placing the unit on or near the dashboard of your vehicle will be satisfactory. You can use Velcro fasteners to secure your T22 to the dashboard. In many vehicles your T22 will work in the glove box, center console or even under the passenger seat.

When you have selected a location leave the T22 there for a minute and check the red GPS light – it will turn off when your T22 knows its location. If the light remains red then check the troubleshooting section.

You can also use the optional external GPS antenna to reach a good location inside your vehicle.

Tip: Several types of tinting are available from companies that allow electronic signals through.

Step 2. Setup

After T22 has been installed into the vehicle you are ready to become the ‘Owner’ of your T22. Only Owners have full access to all the features of your Tramigo. You communicate with your T22 using normal text messages sent to the phone number of the SIM installed in your T22. Follow these steps:

- 1) Send a SMS with the message OWNER,0000 to your T22. If the T22 does not answer go to the troubleshooting section. Note 0000 is the factory set password that you can change later.
- 2) After about 5-10 seconds the T22 unit will respond with a text message: “Tramigo: Owner, please reply “Owner,YES” to register as owner”
- 3) Reply with a SMS with the message OWNER,YES to your T22
- 4) After about 5-10 seconds the T22 unit will respond with a text message: “Tramigo: Owner, +5551234578 registered, 09:25 Jan 14”. This means that you are now the registered Owner of your T22 and it will accept any commands that you send to it from your phone.
- 5) Tramigo M1 software provides a simple to use menu interface that makes your T22 even easier to use on phones and your PC. M1 is included in your Tramigo CD or check www.tramigo.net for the latest versions.

Step 3. Track

Now your T22 is ready to use. From your mobile phone try sending the FIND command to your unit – just send a SMS with the text F in the message – upper or lower case. Turn on trip and power reporting by sending a SMS with T>P to the unit. Your T22 will respond with a text message confirming the reporting is turned on.

To allow your friends to find you add their phone numbers using the ADDUSER command. Send AU,phoneNumber,friend to add a friend’s mobile number.

Try some of the commands in the summary below and connect with your car, bike, boat, or backpack!

T22 Commands

This is a list of the most common commands that you will use. For a full list see the T22 User Manual located on your Tramigo CD.

Send ?, H or Help to see a list of the most common commands. Each user must set their own reporting options so you give them access by using the ADDUSER command listed below.

Upper or lower case can be used in the commands. Most commands also have a short form to save typing. For reports you can just use one letter to turn the report on or off: Example sending a text containing A will turn on alarm reporting if its currently turned off.

SMS Command	Example Command/Report (Short form use if available)
-------------	--

LOCATION REPORTING

<p>FIND – Shows the location of your car. You can also send a blank SMS message</p> <p>FIND,NEAR shows the 3 nearest locations</p> <p>FIND,time turns on periodic reporting. You will receive a FIND report every x minutes specified between 1 and 1440 minutes or daily or weekly</p> <p>FIND,off turns off periodic reporting.</p>	<p>F</p> <p>F,DAILY will send a FIND report once per day</p> <p>Tramigo: parked, 0.58 km E of Makati Sport Club/Salcedo Village, Makati, NCR, RP, old position, 20:38 Nov 5</p> <p>Unit will show as parked until a trip has started.</p> <p>The text old position means that the unit has not had an updated position in over 3 minutes</p>
